

Medical Science Liaison

Do you want to be part of building a fully integrated biopharmaceutical company together with a team of highly skilled colleagues who are passionate about developing best-in-class therapeutics that address significant unmet medical needs? Then Ascendis Pharma is committed to support your personal development on our journey towards becoming a leading rare disease company.

Ascendis Pharma is looking to hire multiple experienced Medical Science Liaisons to join our team. This is an exciting opportunity to join a rapidly growing, innovative company!

Position Summary

Serving as a link among key functions, the Medical Writer ensures that critical scientific information is communicated with clarity, precision, and accessibility. This position will work cross-functionally with therapeutic teams, including Clinical, Commercial, Marketing, Communications, Regulatory, and Legal, to prepare manuscripts, abstracts, posters, reports, presentations, and other materials. The position will report to the Director, Medical Science Liaisons. **Each position will be based remotely and will be based in the following geographies: North East, Southeast/Florida, Midwest, California/West and Texas. Please specify which geography you are interested in when applying.**

Key Responsibilities

- Be the trusted scientific partner to key external experts by conducting timely, appropriate and frequent scientific exchanges to enhance the understanding of the scientific and medical value of our products
- Develops and executes regional strategic medical plans for all marketed products as well as products in development across the Ascendis portfolio.
- Identify and develop professional peer-to-peer relationships with key opinion leaders (KOLs), managed market customers and other prominent healthcare providers
- Ensure alignment with medical affairs and corporate initiatives
- Support high-quality, global medical affairs department
- Ensure department policies, procedures related to scientific exchange and assist in the relevant corporate policies and SOPs
- Ensure compliance with legal and regulatory guidelines to emphasize and provide medical and scientific accuracy and fair balance in all MSL communications.
- Establish collaborations with Clinical Operations to enhance patient enrollment in company-sponsored clinical trials by identifying appropriate clinical trial sites and interacting with investigators in ongoing studies
- Support R&D and the clinical operations team with all US clinical studies
- Establish collaborative and compliant relationship with Commercial colleagues
- Interact and collaborate with Legal/Compliance, Human Resources and Finance Departments to ensure an effective, compliant and strategically focused MSL Team.

- Provide scientific support at medical congresses. MSL team will involve and attend at scientific meetings/conventions and prepare for clinical data presentations, conferences, and internal or external meetings.
- Provide timely feedback and insights on emerging clinical/scientific themes and opportunities to internal stakeholders
- Provide scientific support for appropriate educational initiatives.
- Comply with all company policies and SOPs.
- Assist in strategic management of investigator sponsored trials (ISTs)
- Work and develop collaborative working relationships with regional and national thought leaders.
- Support MSL team with the identification and maintenance of relations with national and regional and medical and scientific key opinion leaders (KOLs)
- Provide medical presentations to both internal and external audiences within legal, compliance and regulatory guidelines
- Provide ongoing field updates and insights including competitive intelligence to internal stakeholders

Knowledge, Skills and Experience

- Doctoral degree (PhD, PharmD, or MD) required
- MSL experience and 5+ years management experience preferred
- Proven track record of success, especially in the areas of establishing and maintaining thought leader relationships, territory planning, and integration with other field roles
- Demonstrated ability to comprehend complex scientific, medical, and emergent business issues and modify regional commercial meetings accordingly
- Strong interpersonal and communication skills, both oral and written
- Excellent ability in searching and interpreting medical literature
- Strong understanding of industry and regulatory guidelines pertinent to appropriately interaction with healthcare professionals and other customers in a compliance manner
- Must possess a valid driver's license in the state of residence; must possess and maintain a satisfactory driving record
- Ability to travel up to 40% domestically and internationally
